

The Dream Program

A truly comprehensive Arabic studies program in the United States

B A Y Y I N A H

What is DREAM?

Bayyinah started in 2005 with a vision to facilitate Qur'anic appreciation through Arabic study intensives. After having visited well over a hundred communities all over the United States, the time has finally arrived to take the next step in fulfilling this noble vision.

Bayyinah is proud to introduce the **DREAM** program; a ten month long, full time, powerful Arabic program that is to provide students in the United States an opportunity to obtain a high level of Arabic education without having to travel abroad; a level that before this program has long been an unfulfilled dream.

The **DREAM** program will be offered in a state of the art facility in the heart of the Dallas Metroplex in Texas,. The ten thousand square foot space will comfortably accommodate a batch of fifty students each year. For students that will be attending from out of state, the location serves an added advantage. It is close to the airport and there are several options for affordable, safe and appropriate housing within a square mile of the **DREAM** location.

Bayyinah is trying hard to be accommodating not only to high school and college students but to families as well. Couples and even parents with their children that are old enough will be given an opportunity to apply to this exciting program.

Bayyinah will also be identifying select students from the program and offering them a chance to become Bayyinah certified Arabic instructors after going through a rigorous teacher training program. Just imagine the quality enhancement this program will bring to Islamic schools and centers all over the United States.

Additionally, we at Bayyinah recognize that there are youth all over the United States that have a great deal of talent and leadership potential. We are inviting each community in the United States to sponsor their own talent pool and let us train them in their Arabic and Qur'anic studies. This, we hope, will bring about a new wave of well trained young leaders that can truly benefit from scholars and translate those teachings to wider audiences.

The application process is set to launch and classes will begin in September of 2010. We urge you to spread this document among family and friends. Find out how you can support this project by visiting bayyinah.com/DREAM.
